

# Purpose-Built to Move Materials, Equipment and Teams

The **Taylor-Dunn** electric vehicle platform delivers safe, durable, and versatile performance designed for facilities where materials, equipment, and teams need to move efficiently every day.

Taylor-Dunn electric vehicles offer a practical way to move materials, equipment, and personnel across your operation. Designed for environments where manual handling slows productivity and larger vehicles are not always the right fit, Taylor-Dunn delivers a reliable and efficient solution for daily work.

Whether supporting internal logistics in a warehouse or moving equipment across a facility, Taylor-Dunn helps keep operations running smoothly and efficiently.

## Built for the Way Work Gets Done

### Purpose-Built for Daily Tasks

Move materials, equipment, and personnel with reliable towing and hauling performance without added complexity.

### Safe, Durable, and Built to Last

Engineered for demanding environments, Taylor-Dunn vehicles are designed to perform consistently under daily use.

### Lower Cost to Operate

Electric power and simplified maintenance help reduce operating costs while supporting long-term performance.

### Flexible for Any Operation

From warehouses to campuses and commercial properties, Taylor-Dunn adapts to a wide range of tasks and workflows.
