

COACH MODEL	2023 & Newer Vanhool CX45/35
DATE	05.02.2025
SUBJECT	Alternator Pulley Replacement

Disclaimer!

Please ensure that your coach's alternator is properly affixed with the correct pulley before operating. All new-order alternator replacements come with larger, pre-installed pulleys (Figure 2) that must be swapped out with smaller, older pulleys (Figure 1).

For best practice, remove the larger pulley (Figure 2) from your brand-new alternator. Then, **utilize** the smaller pulley (Figure 1) from the old/retired alternator by **installing** it on the new alternator. *If the smaller/older pulley is damaged or inadequate in any way, be sure to order a new one along with your new alternator.*
