| **COACH MODEL :** | All VanHool Coaches |
| **DATE :** | 12/13/2016 |
| **SUBJECT :** | Electronic Logging Device (ELD) |

The ELD mandate will apply to all drivers required to keep records of duty status, except drivers who (1) keep records of duty status in 8 or fewer days out of every 30 working days, (2) drivers in drive-away and tow-away operations and (3) truckers operating vehicles older than model year 2000.
The devices must be installed and in use by Dec. 16, 2017.

The rule also requires compliant devices to be able to transfer data during roadside inspections “on-demand,” via either a wireless Web-based services, email, USB 2.0 or Bluetooth. The rule also stipulates that the ELDs “present a graph grid of a driver’s daily duty status changes either” on the units themselves or in printouts

It has been brought to our attention that we need more explanation on where or how to hook up your ELD. Due to the fact that there are numerous manufactures of the ELD installations may vary. Follow the manufactures directions. Below we will show you the diagnostic connectors commonly found on. van hool coaches. Its best to verify what connector is installed on your coach.

6 pin connector was used on Van Hool coach's from 2000 - 2005

9 pin connector was used on Van Hool coach's from 2005 -2016

9 pin connector 500kb used on Van Hool coach's from 2016 -

In some instances, it may be necessary to have an ABC Representative install a separate CAN Line for your ELD on EPA 17 engines. This would consist of installing a separate CAN line from the Gateway utilizing CAN D plug and programing the Gateway to the dash.
