

COACH MODEL : All VanHool Coaches
DATE : November 20 2022
SUBJECT : Lug Nut Cap Securement

When reinstalling lug nut caps, follow the instructions below to properly secure the cap to the lug nut and avoid having them coming loose and falling off.

Figure 1: Lug Nut Cap Interior

Figure 2: Hand Tight Lug Nut Cap

- With the lug nut cap removed, verify all tabs are intact and in good condition. Figure 1.
- Install the lug nut cap onto the torqued wheel lug nut by hand.
- Hand tighten the cap, you will feel a single "click". Figure 2.

Figure 3: Tightening Lug Nut Cap

Figure 4: Tap Lug Nut Cap

- Locate a 1 1/4" socket and wrench.
- Tighten the lug nut cap approximately 1/4 turn, you will feel another "click". Figure 3.
- The lug nut cap will slightly pull up in the tight position, lightly tap the cap with a rubber mallet. Figure 4.
- The lug nut cap will "click" when fully seated.
- Verify the cap is fully secured by trying to remove by hand.
